BAMBOO

Bamboo belongs to the grass family and is one of the fastest renewable raw materials. Its natural hardness is similar to that of many hardwoods. Bamboo is particularly cut-resistant, durable and dimensionally stable. Due to its dense surface structure, no liquid penetrates, which makes bamboo very easy to maintain and as ecological alternative to plastic. Simply wipe with lukewarm water and a cloth. For maintenance, treat regularly with commercially available virgin edible oil. Its unique natural grain makes every article unique.
